## EDUCATION

**2023 – PRESENT**  
**THE SUPERIOR UNIVERSITY**  
BS Computer Science

## SKILLS

### Programming

- Python, SQL

### Automation & AI

- n8n, Make.com, Gemini AI

### APIs & Integration

- REST APIs, Webhooks, WhatsApp Business API, Postman

### Data & Web Scraping

- BeautifulSoup, JSON, CSV, Web Scraping

### Tools

- Git, GitHub, VS Code

### Web

- WordPress

# SAAD SAEED

## AI AUTOMATION & WORKFLOW DEVELOPER

## PROFILE

Computer Science student with hands-on project experience in AI automation, workflow development, API integration, and Python scripting. Built end-to-end automation projects using Make.com, n8n, Gemini AI, WhatsApp Business API, and REST APIs. Experienced in web scraping, AI-based data extraction, content automation, and structured data handling. Seeking an entry-level or internship opportunity in AI Automation, Python Automation, or Workflow Automation.

## PROJECTS

### AI-POWERED SOCIAL MEDIA AUTOMATION

Make.com · Python · AI · REST APIs

- Built an end-to-end workflow to automate content publishing across Facebook, Instagram, and LinkedIn.
- Integrated AI-powered caption generation to create platform-specific social media content.
- Developed a web-fetching component to retrieve and process image data from source URLs.
- Designed modular workflows with scheduling, API integration, data processing, and automated publishing.

### AI-DRIVEN WHATSAPP ORDER & LEAD CAPTURE

n8n · Gemini AI · WhatsApp Business API

- Built an automated WhatsApp workflow for customer order and lead information capture.
- Integrated Gemini AI to extract names, contact details, order requirements, and other entities from customer messages.
- Converted AI-generated information into structured JSON data for further processing.
- Automated lead and order logging into CSV, reducing manual data entry.
